## Choosing & Designing the Right Solar System for You

Atlasta Solar will design a grid-tie system with enough solar panels to produce a portion or all of your energy needs for the lifetime of your business—shrinking your energy bills to almost zero.

Grants and Guaranteed Loans up to \$500,000 are available to Farms and other Agricultural Businesses. Ask Atlasta Solar about funding—we can help you secure the financing that you need.

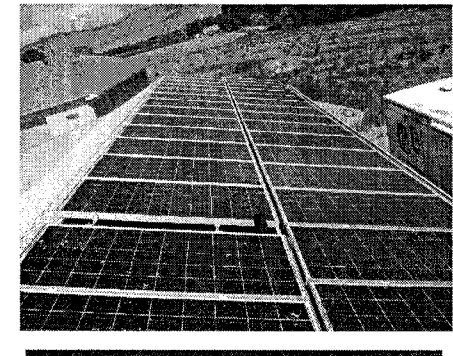

## What Would Be My Savings if I Invested in a Solar Energy System?

| Solar Energy System Size | Actual System Cost* | Utility Rebate | Federal Tax Credit | Accelerated Cost Recovery (1-6yrs) | Your Cost After Deductions |
|--------------------------|---------------------|----------------|--------------------|------------------------------------|----------------------------|
| 1kW                      | \$9500              | -\$4500        | -\$1500            | -\$1130                            | \$2370                     |
| 3kW                      | \$28500             | -\$13500       | -\$4500            | -\$3400                            | \$7100                     |
| 5kW                      | \$47500             | -\$22500       | -\$7500            | -\$5660                            | \$11840                    |
| 7kW                      | \$66500             | -\$31500       | -\$10500           | -\$7920                            | \$16580                    |
| 10kW                     | \$95000             | -\$45000       | -\$15000           | -\$11320                           | \$23680                    |

\* Not Including Sales Tax and Building permit
