Powering your remote home with our custom built, the Plug & Play Power House

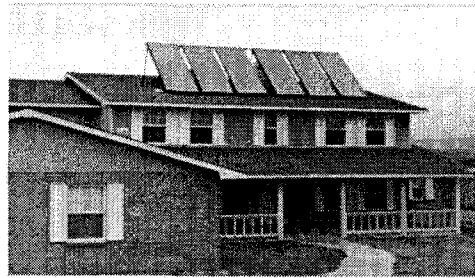

This Power House puts out up to ten thousand watts a day with the option of up to 11,500 watts. The average household uses about two times this much, therefore we teach conservation every day. Our top of the line quality propane generator provides a quiet backup power source. We have delivered this Power House to remote homes all over the Western Slope. Include this new power source in your remote home loan and increase your remote land value. Please visit us so that one of our professional staff may assist you.

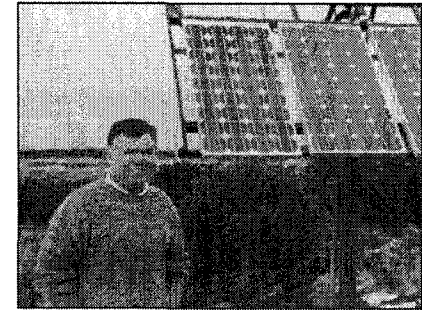

Heat your home with the most reliable resource known to man.

By using our solar thermal panels you can heat your home and Reduce Rising Energy Costs.

In the last couple of years gas prices have risen significantly enough for us to engage heavily in the sales of Solar Thermal. You can use this in your home, garage, business, or anywhere you might be needing heat.

Virgil Boggess

Has owned, operated and run Atlasta Solar Store in Grand Junction since 1979. ( One of the only solar show rooms available in Colorado today )

We also offer wind as a backup.
